Ryzhov, O. S. and Shefter, G. M.  
ON UNSTATIONARY GAS FLOWS IN LAVAL  
NOZZLES. [1960] 4p. 7 refs.  
Order from LC or SLA m\$1.80, ph\$1.80 61-10374  
Trans. of Akad[emiya] Nauk SSSR. Dokl[ady] 1959,  
v. 128 [no. 3] p. 485-487.

The wave equation of acoustics defines the unsteady motions at sonic velocity approximately which rapidly vary within the course of time. If the parameters vary more slowly, the character of the motion largely remains unsteady, and the same nonlinear term is to be retained in the equation for the velocity potential as in the conventional theory of steady flows. An exact solution of this nonlinear equation is given. This solution is a generalization of the solutions for steady gas flows in the surroundings of the transition surface in Laval nozzles. The latter are assumed to possess two planes of symmetry.
